Customizing your colors

We realize that not every themelet design is ever going to be a 100% perfect fit for your business, so we have given you a couple of options to customize the colors to fit you own brand.

----- ✂ -----

Not sure about which colors to choose? Here is a list of our favorite (free) color palette generators:

The concept of the inner & outer layouts require a bit of understanding to grasp, but once you do you will have unparalleled flexibility at your finger tips.

-----✂-----
Based on commonly accepted *best practices*, we refer to your sites main content as your **primary content** & likewise your two optional sidebars are referred to as your **secondary & tertiary content**. This naming convention relates to the importance of the content & is ordered accordingly in your sites source code.

Code Editor

The code editor is used to add your own custom css, javascript or php and will save your custom code in the database, protecting your changes from upgrades. If you find the editor sluggish, try disabling the syntax highlighting in the Configurator preferences.

Summary

- Advanced Joomla Template Framework
- A lot of build-in advanced features
- Suitable for mass website production or SME projects e.g. restaurants, takeaways, charities
- Ultra Fast Implementation
- Deep Learning Curve, but well worth the effort!
